- IB Learner Profile: **Thinkers:** We strive to help our students with critical thinking. Critical thinking encourages students to be curious, to ask questions, make connections with others, be objective with their approach to a situation and to look for alternative perspectives on matters. Through critical thinking, we hope students will be able to reflect on what they are learning not just accepting what they read or hear. We encourage questions from students as they learn new material. This shows us that they are really learning the material, not just regurgitating information. This skill will also help as they form their own opinions as they grow older.
